PROJECTS

[1] Smart Bridge

The "Smart Bridge Project" represents an innovative hardware-based solution designed to address the pressing challenge of mitigating the impact of flooding on critical infrastructure. This project introduces a novel approach by integrating water sensors into bridge systems.

When the water sensors detect rising water levels, the bridge automatically raises itself, minimizing the risk of damage and ensuring the safety of both pedestrians and vehicles. The system's real-time response to environmental conditions enhances the resilience of bridges in flood-prone areas, demonstrating the potential to significantly reduce flood-related disruptions and repair costs. The Smart Bridge Project embodies the convergence of cutting-edge technology and civil engineering to create a safer and more adaptive urban infrastructure.
